

Telecare everywhere

Oysta's Pearl+ and software provides cost effective telecare support outside the home. SOS alarms, location monitoring and one touch connection to family and carers can all be delivered through a single mobile device.

Pearl+ can improve outcomes in a variety of situations, providing personalised support to people with learning disabilities, dementia and a range of long-term health and care needs.

Key Features	
Mobile	Improving quality of life, levels of physical activity and social inclusion for users and carers.
Proven	Thousands of users across Europe and proven technology from an established supplier.
Highly flexible	Supports a broad range of care needs, with the service remotely configurable to the individual's needs in seconds.
Integrated care	Alerts and alarms can be provided to both professional and family carers, joining together the formal and informal care network.
Easy and low cost to deploy	No onsite installation and no complex equipment. Alarms can be handled through existing PNC equipment* (6.3 and 7).
Confident communication	PNC supports the delivery of alarms using both voice and data channels ensuring the right messages reach the right person at the right time.
Easy to use	One touch SOS alarm button and 4 speed dial keys. Discrete and light weight.
Adaptable	Can be used to support lone workers.

*Requires additional modules

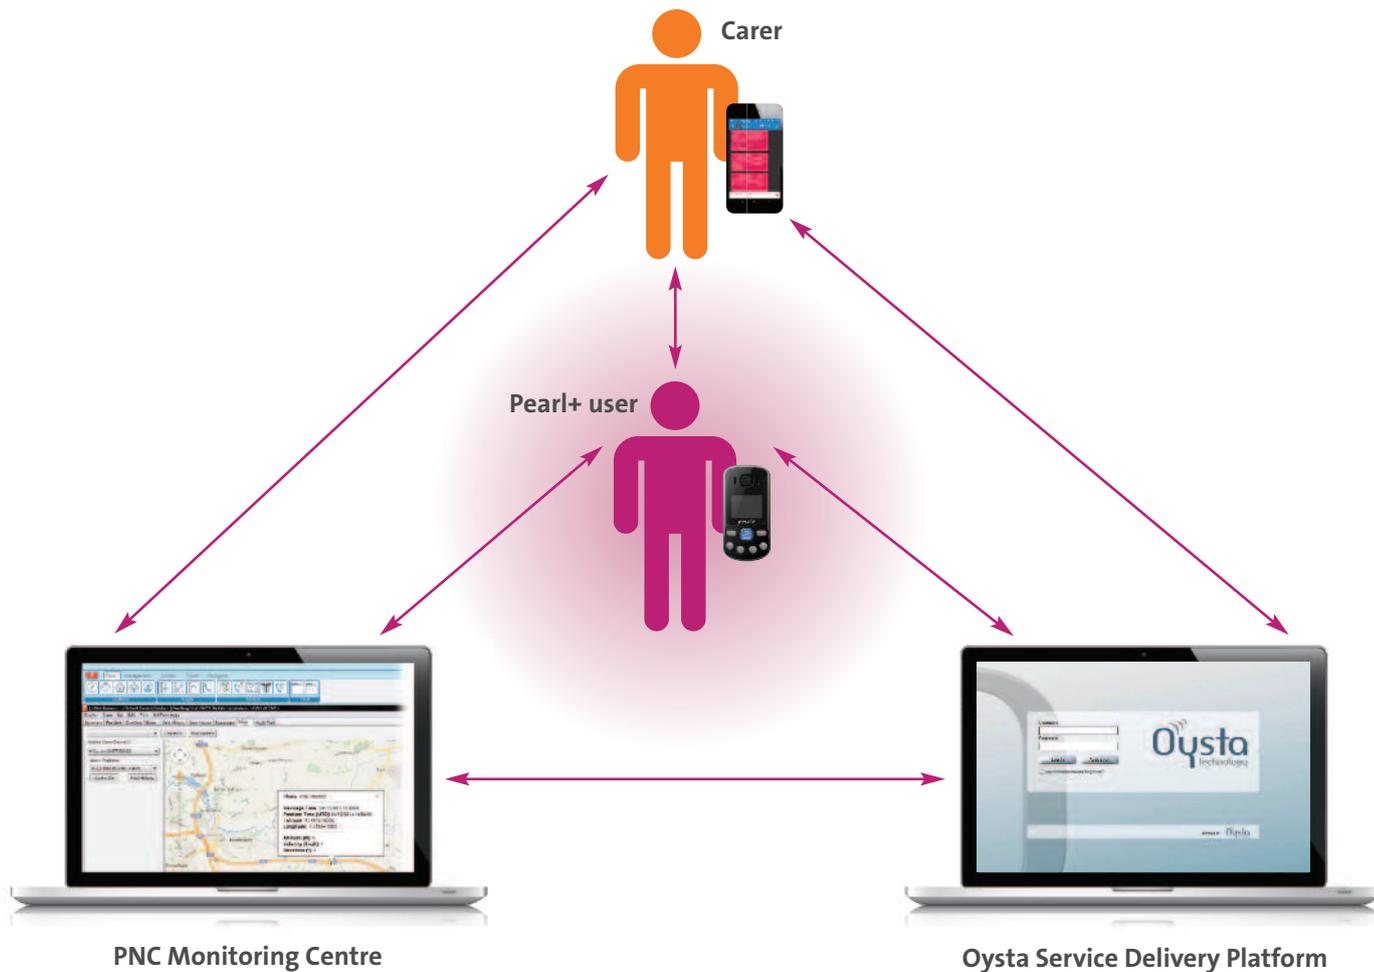

- One touch SOS alarm button for help in an emergency
- Out of safety zone alarm provides a safety net for independence
- Auto-answer enables caller to initiate a conversation
- 4 speed dial keys, easily assigned to phone numbers of your choice

Dimension (mm - H/W/D)	92 x 44 x 17.9 mm
Weight (g)	74g

Joined up support

Pearl+ links the user, formal and informal carers and the monitoring service with ease.

Case Study - Peter, 18

Peter's parents always knew that he needed to stand on his own feet as soon as possible. Due to his mild learning disability and Down's Syndrome, Peter finds some aspects of life difficult. Moving out of his parents' house to his own was a big step, especially given that the new place is in a town Peter doesn't know, 30 miles away from his parents'. Telecare was implemented to make the new house safe but the biggest challenge was accessing a new college, public transport, and to be able to visit his parents, without being supported.

When presented with his Oysta device, Peter said it was "better than Christmas". He understood exactly what the device can do and that it is key to him being able to live a normal life. Equally, his parents were extremely impressed by the service, mainly, the online tracking access.

To find out more, contact Tunstall on **01977 660479** or enquiries@tunstall.com

As with all mobile location solutions alarm calls can only be transmitted when GSM/GPRS signal is available and the device is charged. The Pearl+ is supplied with a roaming SIM card to maximise signal coverage.

Our policy of continual development means that product specification and appearance may change without notice. Tunstall does not accept responsibility for any errors and omissions contained within this document.
